

## Schedules for Clinical Assessment in Neuropsychiatry (SCAN): Glossary

Filesize: 6.58 MB

### ***Reviews***

*A must buy book if you need to adding benefit. I have read through and i also am certain that i will likely to read through once again yet again in the future. Its been designed in an exceedingly simple way and is particularly merely after i finished reading this publication by which really modified me, modify the way i think.*

## SCHEDULES FOR CLINICAL ASSESSMENT IN NEUROPSYCHIATRY (SCAN): GLOSSARY

American Psychiatric Publishing. Spiral bound. Book Condition: new. BRAND NEW, Schedules for Clinical Assessment in Neuropsychiatry (SCAN): Glossary, World Health Organization, SCAN - Schedules for Clinical Assessment in Neuropsychiatry - is a set of instruments aimed at assessing and classifying psychopathology in adults. Developed in the framework of WHO and the US ADAMHA Joint Project on Diagnosis and Classification of Mental Disorders, Alcohol and Drug Related Problems, SCAN is a set of instruments aimed at assessing, measuring and classifying the psychopathology and behaviour associated with the major psychiatric disorders of adult life. The assessment is based on clinical cross-examination of the presence of specifically pre-defined symptoms of psychiatric disorders. It can be used for clinical, research and educational purposes. SCAN has four major components: PSE-10, the 10th edition of the Present State Examination; the SCAN glossary; the Item Group Checklist (IGC); and the Clinical History Schedule (CHS). The PSE, IGC and CHS are included in the manual. The Glossary is sold separately. In the PSE-10, Interview Schedules are used to record the respondent's experience against predefined item concepts. Items cover subchapters in ICD-10 and DSM-IV. PSE-10 itself has two parts. Part I covers somatoform, dissociative, anxiety, depressive and bipolar disorders and problems associated with appetite and alcohol and other substance use (14 sections covering F1, F3, F4 and F5). A screen for Part II conditions is also included. Part II covers psychotic and cognitive disorders and observed abnormalities of speech, affect and behaviour. This part, the SCAN Glossary is the most important component of SCAN, because it is the basis for comparison that must be learned and carried in the interviewer's mind during the examination. The interviewer matches what the respondent says or does against the Glossary definitions. The Glossary is a comprehensive dictionary of differential definitions of clinical phenomena....
