

## Mathematical Questions and Solutions in Continuation of the Mathematical Columns of the Educational Times Volume 67 (Paperback)

Filesize: 6.51 MB

### ***Reviews***

*This publication is fantastic. We have read through and i am certain that i will planning to read yet again yet again down the road. You wont feel monotony at at any time of your respective time (that's what catalogs are for concerning when you request me).*

To download **Mathematical Questions and Solutions in Continuation of the Mathematical Columns of the Educational Times Volume 67 (Paperback)** eBook, make sure you refer to the web link below and save the document or gain access to additional information which might be related to MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES VOLUME 67 (PAPERBACK) book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1897 Excerpt: .10857 yards. Find the distance of the rock from each of the headlands. 13361. (W. C. Stanham.)--Construct (a) a right-angled triangle having its angular points on the given rectangular hyperbola  $x^2 - y^2 = c^2$  (rectangular coordinates), and its centroid at the point  $(Ja \cos c, fa \tan f)$ ,  $p$  being any given angle; and show (4) that, both in this case and in the case in which the centroid is to be at the point  $(a \sec p, a \cot f)$ , the determination of the coordinates of the angular points of one such triangle will not necessitate the solution of an equation of a degree higher than the second. Solution by the Proposer, Professor Radhakrishnan, and others. Let  $G$  be the point  $(i \cos f, l i \tan f)$ , or  $(x, y)$ , and let  $CG = r$  and  $\angle GCA = 29$ . (a) Draw  $CP$  to the curve, bisecting  $GCA$ ;  $CO$  at right angles to  $CP$ , meeting  $PG$  in  $O$ ; and  $QOR$  parallel to the diameter conjugate to  $CO$ . Then  $PQR$  is the triangle required. For  $OR^2 = OQ^2 = CO^2 + CP^2 = OP^2$ , since conjugate diameters (sic) are equal, and diameters at right angles Note on Quest. 6617. By H. W. Curjel, M.A. The Solution to this Question on page 25 of Vol. Lx. is evidently wrong,  $OP$  being the semi-diameter down which a particle will fall in the same time as down  $OA$ . If  $OB$  is the semi-diameter of quickest descent,  $R$  is evidently one of the...
